

## Benier Tallround (HDS)

The combination of a cylinder and a cone provides an optimal rounding performance. When nice rounded balls are required (for pizza processing, for example) at a relatively high capacity, our Tallround is your solution.

The Tallround is also available in a HDS version for higher capacities.

For more information about the Benier rounders or advice about the right rounder for your bakery please contact us.

### Key features Tallround:

- Cylindrical and conical parts in special lightweight alloy reduces wear and tear
- Multi-layer Teflon coating for smooth rounding process
- The sealing between cone and track reduces dough damage, chipping and prevents cone damage
- Teflon-coated discharge chute
- Benier service box: instruction videos to support you with installation, operation, maintenance and cleaning for a longer lifespan for your machine
